DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Gewelber et al.

Re claims 1-21, Gewelber discloses a bicycle disk brake rotor apparatus comprising: a generally circular first rotor (11) member with a first fixing component (54) structured to mount the first rotor member to a hub mounting member, a generally circular first second rotor (10) member with a first second fixing component structured to mount the first second rotor member to the hub mounting member, wherein the first rotor member is attached to a side of the first second rotor member, and wherein the first second rotor member is formed of a material having greater braking wear resistance than the first rotor member.

Claims 5-8 are deemed by the examiner to be product by process claims.

Product by process claims are not limited to the manipulations of the recited steps, only the structure implied by the steps.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Buyze and Main et al. teach disc brake rotors.
